

SUNKWH Distributed Intelligent Microgrid Solution

Grid-Connected & Off-Grid Hybrid Mode

01 What is a Microgrid

This microgrid is a small, smart power system built on PV and storage. It supports both grid-tied and off-grid modes, solving outages, remote supply issues and high peak-valley costs.

02 Product Strength

Stable Power Supply

Cost Savings

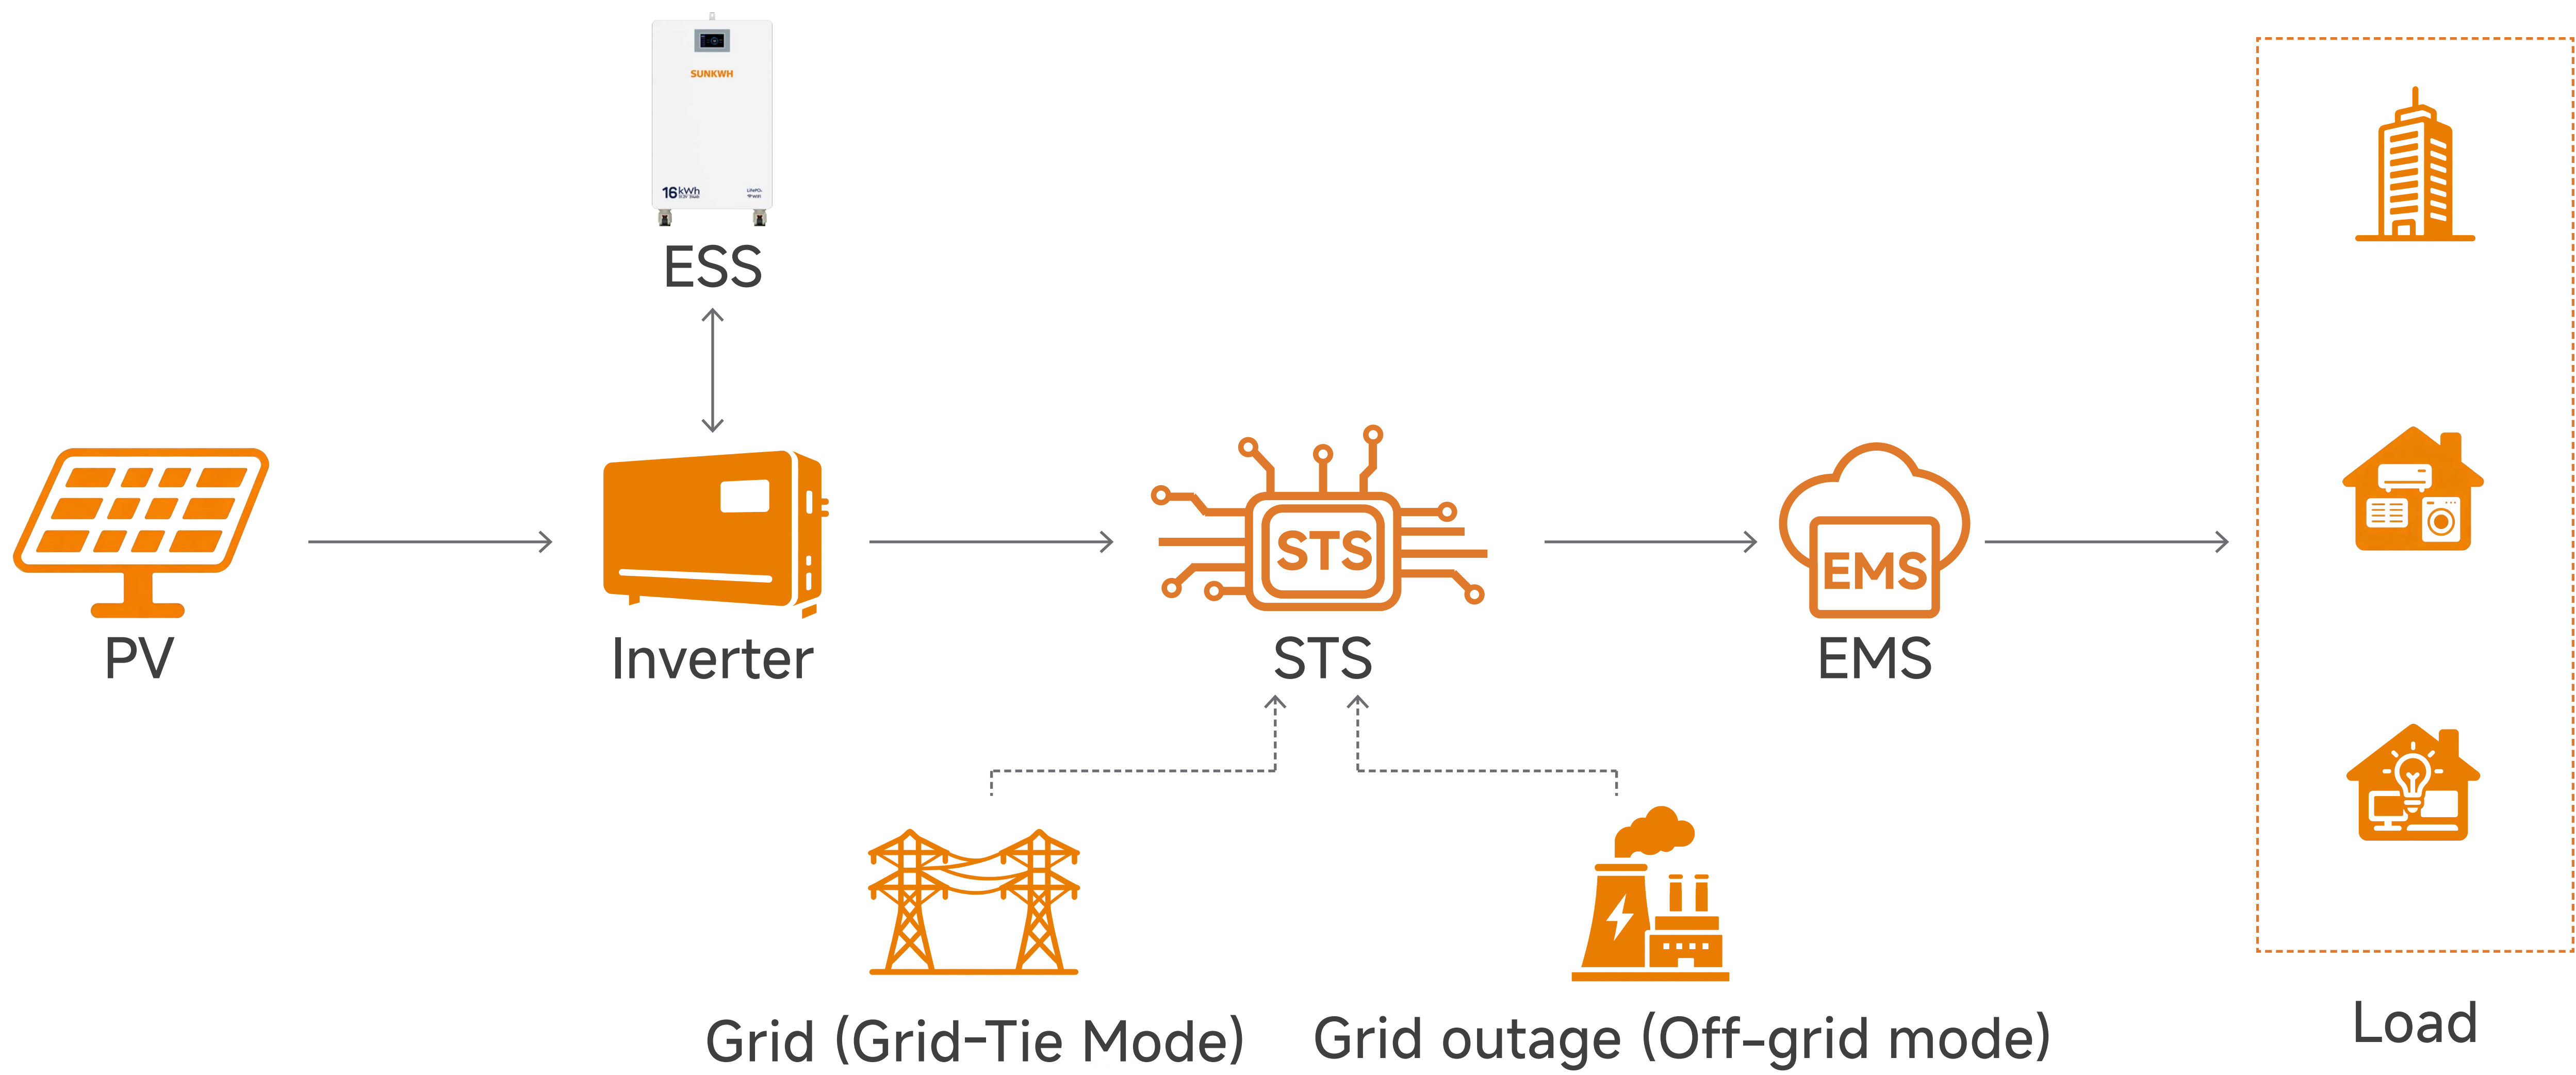

On/Off-Grid Mode

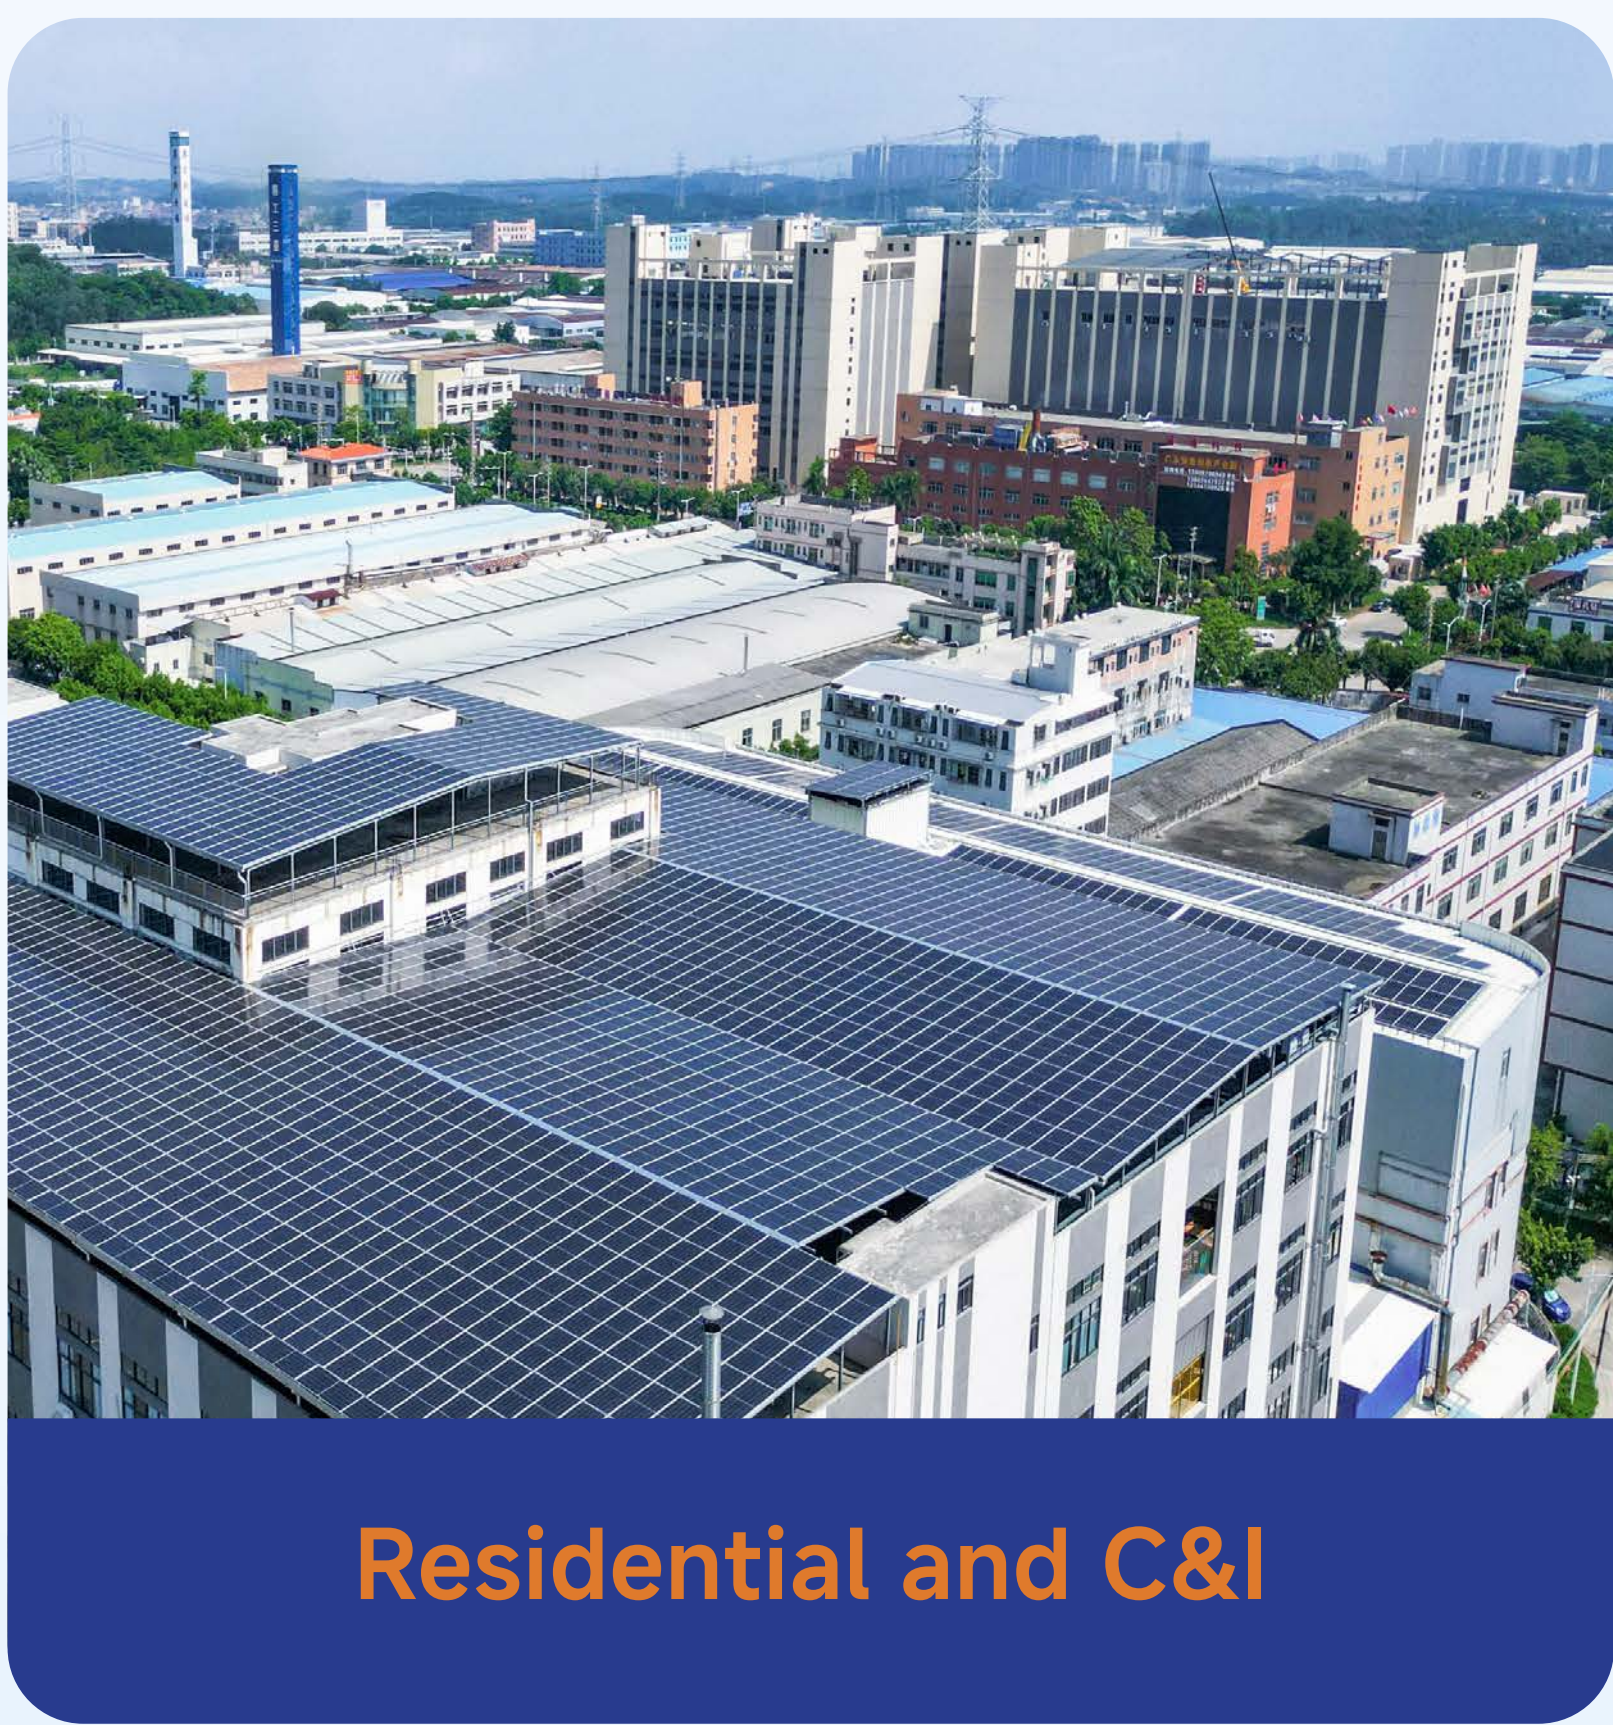

Cloud-Based Smart Management

03 Microgrid System
